

Role : Senior Software Engineer - Backend

Location : Bangalore/Remote

Experience : 4-6 years

About us

Lucidity is a rapidly growing company with a first of its kind and impactful product in the cloud storage. Joining Lucidity offers the opportunity to work on cutting-edge technology, solve real-world problems for major enterprises, and be part of a company that is reshaping the future of cloud storage.

- We were also awarded **Best Infra and Dev Tools SaaS Startup** by SaaSBoomi – [Link](#)
- Listed among **India's Top Startups by LinkedIn** [Link](#)
- We are backed by \$32 M in funding from investors like Alpha Wave Global, WestBridge Capital, and Beenext - [Link](#)
- We are the category leader in cloud storage optimization.
- Trusted by major enterprises, including Fortune 500 companies spanning across the US and the UK, being the major Markets.
- Opportunity to work with experienced co-founders [Vatsal](#) & [Nitin](#) - serial entrepreneurs who bring with them more than a decade of experience working with companies like Microsoft, Swiggy, and Tracxn and building and selling large tech products.
- We have a presence across India, Abu Dhabi, the US, and the UK.

What we do

Lucidity is a company that provides an automated NoOps disk auto-scaler for cloud storage across AWS, Azure, and GCP. It addresses over-provisioned block storage by dynamically scaling capacity, increasing disk utilization to around 80% from 25-35%. This results in cost reductions of up to 70% for businesses.

Here's a [video](#) of what Lucidity does.

Key benefits include:

- **Significant Cost Savings** on storage (especially EBS costs).
- **Elimination of Downtime** by preventing disk space issues.
- **Reduced DevOps Effort** through automation.
- **Application Agnostic** solution works with various systems.

About the role

Responsibilities

- Writing clean, high-quality, high-performance, maintainable code
- Develop and support software including applications, database integration, interfaces, and new functionality enhancements
- Coordinate cross-functionally to insure project meets business objectives and compliance standards
- Support test and deployment of new products and features

- Participate in code reviews

What you'll do:

Technology is at the heart of our organization. As part of the tech team you will :

1. Understand product requirements and brainstorm ways to address them
2. Build features from scratch and have complete ownership for it
3. Deliver efficient, reliable, scalable code with high automated test coverage
4. Contribute to team decisions in the overall architecture and practices of the company

What you'll need:

Must have

1. At least 4 year experience in a product based company
2. Willingness to work in fast-paced, ambiguous, startup environments
3. Experience working with distributed systems
4. Comfortable with at least one Object Oriented Programming language (C++, Java, Python, Go)
5. Hands on with AWS or at least one other public cloud
6. Strong knowledge of SQL and RDBMS like MySQL
7. Experience with git

Good to have

1. Experience handling highly scalable systems
2. Strong systems understanding (Linux/Windows, kernel tuning/troubleshooting, performance benchmarking, filesystems tuning)
3. Experience with Docker and Kubernetes
4. Storage domain experience is a big plus
5. Familiarity with Agile development methodologies
6. Excellent communication & collaboration skills

Why us

We're hiring a set of highly skilled, enthusiastic, and passionate people who thrive in a high-growth environment. We believe the best way to grow is to give everyone the opportunity to pursue their interests. Plus, with benefits like flexible hours, company offsite, unlimited leaves, we ensure you enjoy the journey as much as we do. Work in deep tech company and be part of an accelerated growth journey

What do we promise?

- A high-growth work environment
- Autonomy to decide & deliver on KPIs
- Work from home | Flexible hours | Unlimited Leaves
- Attractive ESOPs for eligible employees. Potential to see 100x in the next 5 years.
